# SOFTWARE DEVELOPER (PHP)

## *About us*

*Ziegler was founded in 1908 with headquarters in Brussels; Ziegler Group is a leading global logistics service provider offering road freight, airfreight, sea freight, rail freight, inland waterway, logistics, customs clearance, e-commerce and other value-added services. With over 3,200 employees worldwide, Ziegler operates a close-knit global network with some 154 branches in more than 15 countries. In a further 80 countries, it cooperates closely with partner companies.*

*Unlike large global transport groups that operate with an aim for industrialization, the Ziegler Group has always committed itself to remain at a human scale and family-run business. This gives us a flexibility that allows us to offer tailor-made services as needed.*

*"We are architects for transport and logistics. We plan, design and construct a competitive worldwide network to transport, store and handle goods easily and reliably by land, sea and air. We know regional conditions and give individual support to our customers to be globally successful."*
